communicate & share

Please fill out the form at the bottom of this page, sign it and mail it to the address given above.

---

### Terms of service for the Rinux Platform Domain management (agreement addendum)

#### Preamble

These conditions should be interpreted as a contract between the service provider (see top of page) and the user (see bottom of page).

#### 1. Agreement addendum

These conditions state rules valid in addition to the general terms of service.

#### 2. Domain connection

It is the user's responsibility to connect the domain to the server (IP address or host name, respectively).

#### 3. Provision of domain-based services, usage entitlement

The provider takes care of the technical management of the domain and will usually provide domain-based services (such as e-mail addresses or web hosting) only for the user. Usage of services associated with the domain by third parties will require prior explicit permission by the user. Domain management will end once the domain is connected to a different physical server.

I agree to the above agreement addendum.
